

## Proven Address - New Appearance

After the necessity of adapting the society's internet presence to the legal developments (data protection directive) of recent years, we decided to completely rebuild the website. Thus, the board is proud to be able to present a new website as of May 1, 2019 - visually, technically and legally up-to-date. The appealing design was created by the board member Dr. Götz Hensel made with great commitment using the design tool Jimdo - at this point, a heartfelt thank you for the excellent work.

What's new is not just the implementation of the current privacy policy. Also new is that the websites are completely bilingual - in German and English - and the language can be changed at any time.

The member area with internal information is still password-protected. Here, however, the users no longer need to register separately - the entry of the general password is sufficient. This will be communicated to all members in separate email.

The well-known address has remained the same. Take a look at [www.pflanzen-biotechnologie.de](http://www.pflanzen-biotechnologie.de) and be inspired by the new look.

In the future, the current content should be made livelier, so that a regular visit is worthwhile to stay informed about news from the field of plant biotechnology.
