

**Invitation to the**

**2023's Workshop**

**Plant Biotechnology**

**And to the General Annual Meeting  
Of the Society of Plant Biotechnology  
in Cooperation**

**with the German Plant Protection  
Conference**

**on 25th of September 2023**

**Georg-August-University Göttingen  
- First Announcement -**

Dear colleagues,

Every two years, the Society for Plant Biotechnology organizes a workshop on current topics in plant biotechnology. In 2023, the time has come again, and exclusively in presence! This time the event will take place at the University of Göttingen just before the German Plant Protection Conference. The Annual General Meeting of the society will also be held in this context. In the circle of colleagues, ongoing work from current areas of plant biotechnologies will be presented and discussed on September 25. In order to support the informal workshop atmosphere, sufficient time for discussion and exchange will be scheduled after the lectures, during the coffee breaks, and at the joint dinner. We cordially invite you to actively participate and contribute to the workshops. **The first ten PhD students who register with a contribution (preferably a lecture) will receive a travel allowance of 100 €.**

It is therefore worthwhile to register early.

We are looking forward to your contribution!

Robert Boehm on behalf of the board

The following topics shall be especially be addressed :

- **Genome editing**
- **Transformation- and Regeneration Systems**
- **Sequence analysis and development of Entwicklung Molecular Marker**
- **small RNAs and epigenetic regulation**
- **biotechnological alternatives to plant protection chemicals**

Contributions from other areas are welcomed as well.

If you or your colleagues are interested and would like to contribute to the workshop with your own initiative, we kindly ask you to register and announce a contribution (preferably a talk) using the form at the end of the circular until March 31<sup>st</sup> 2023.

In order to open the workshop to a wider range of colleagues, talks and posters can be presented in German as well as in English.

The registration fee for members of the Society is 10 €, for non-members 30 €. The money can be paid in cash at the registration on site.

Colleagues who are interested in becoming members of the Society are cordially invited to declare their membership at [www.pflanzen-biotechnologie.de](http://www.pflanzen-biotechnologie.de). The membership fee is €50 per year. Student members are exempt from the membership fee upon presentation of proof.

Take the opportunity -  
become a member and support  
the work of the Society for Plant Biotechnology e.V.

The final schedule will depend on the number of announced contributions.

After the registration deadline, the second circular will be sent to the registered participants, containing more detailed information on the schedule and the workshop program.
